## MORE TREATMENTS, MORE QUICKLY.

That's the goal of translational science.

## New treatments take far too long to develop:

require an average of 10–15 years

## fail 95% of the time

## TRANSLATIONAL SCIENCE IS IMPROVING THE PROCESS:

National Center for Advancing Translational Sciences

Learn more at: ncats.nih.gov

Understanding what's similar across diseases to help develop multiple treatments at a time

Developing models that better predict a person's reaction to a treatment

Enhancing the design and conduct of clinical trials so the results more accurately reflect the patient population
